## DETAILED ACTION

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 14-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 27, 31, 34, 40 of U.S.

Patent No. 6, 568,942. Although the conflicting claims are not identical, they are not patentably distinct from each other because substantially similar limitations are being claimed, especially that of the critical limitation: width of said aperture/width of said pin member is from 1.1 to 5. The minor different manner of connecting the various electrical body members or plug to the electricity main supply is deemed obvious connection of parts.

### ***Allowable Subject Matter***

3. Claims 1-13 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art discloses the claimed electric accessory of the instant

Art Unit: 2839

invention including releasably engageable first and second body members, said first body member including a receiving portion adapted to be releasably engageable with a plug member of an electric cord, wherein said second body member includes a first part engageable with said first body member and a second part adapted to be electrically connectable with an electricity mains supply, wherein said first part and said second part are swivellable relative to each other.
